## Specifications:

Continental Metal Products Stainless Steel Utility Tables shall be constructed of type 304 stainless steel with a no. 4 finish. All corners are welded, ground, blended and polished to match a no. 4 finish.

Standard dimensions shall be 25" deep x 36 to 37-1/2" high x 36" to 120" wide (in 12" increments).

Unit shall be constructed of no. 16 gauge stainless steel top with 1/8" high raised no drip marine edge on all four sides to retain water droplets. Underside of top shall be reinforced with no. 16 gauge channels to prevent warping or distortion. Perimeter of table shall have a no. 18 gauge stainless steel apron.

Utility Table shall be freestanding and mounted on 1-5/8" O.D. no. 16 gauge tubular stainless steel legs with enclosed square set screw sockets and adjustable bullet feet to vary height from 36" to 37-1/2" maximum. Four (4) legs are provided for tables 36" to 72" and six (6) legs for 78" to 120" widths. Crossbracing shall be used to secure legs and ensure stability.

When specified, tubular crossbracing shall be replaced with no. 18 gauge stainless steel removable undershelf with boxed edges and center stiffening channel on underside. Where unit abuts walls, back and end splashes are optionally available with 1/4" radius at counter top, flanged up 4" high and returned back 1" wide and down 1/2" to form boxed type edge.

Entire table can be easily assembled at location with use of standard tools.

## Standard Sizes:

<u>Model #</u>	<u>Dimensions</u>	<u>Options</u>
