• Disposal

Specifications
Model H-2008 Autopsy/Dissecting Table shall be constructed of 14 gauge (1.9 mm) stainless steel for top and sinks and 20 gauge (0.9 mm) in cabinets. Separate irrigation hoses shall be provided stored in undercabinet when not in use. Suction hose is to be powered by water aspirator with reversing valve for cleaning hose. Gas cock is to be chrome-plated. Continuous-flushing system is to be integral with rim to eliminate cleaning problems. Hot and cold water faucets are to be provided.

Model H-2008 Autopsy/Dissecting table is result of extensive study and research of work flow of pathologist and diener. Facilities required for post-mortem procedures have been provided and arranged to minimize unnecessary steps.

Need for separate dissecting table (usually located in remote area of room) has been eliminated. Drawers and cabinets have been provided for storage of instruments, plastic bags, saws, etc. Table is constructed entirely of stainless steel and has coved corners in all working areas for ease of cleaning. Cabinet and drawers are to be coved-cornered, and drawers are to be easily removable for cleaning. Rubber cutting board shall be supplied with stainless steel legs to allow flushing underneath with bumpers to keep board steady. Six stainless steel slats in top are to be easily removable. Stainless steel perforated cover is to be provided for waste trough on both dissecting table and autopsy table. Table is to have two 12" (305 mm) x 12" (305 mm) x 10" (254 mm) deep coved-cornered sinks. Stanching over-flow pipe shall be provided for one sink. Disposal shall be available for one sink bowl. Table shall have dry work area for accessories and preparation of specimens. Two waterproof 115-volt electrical outlets.
